## One Pound Propane Tank Disposal

Alfred residents have not been able to dispose of one pound propane tanks for the past year due to the transfer station's inability to dispose of them. These propane tanks are considered "Hazardous Material" and are not accepted by the transfer station. The solid waste/recycling committee has been seeking a solution to this situation and has found that the Coleman Company has introduced a "Green Key Tool" made especially for the general public to recycle the one pound cylinders.

The Green Key tool is inserted into the cylinder and releases all of the residual gas, thus making the cylinder safe for disposal. Once the cylinder is safe for disposal, the transfer station can accept the cylinder for recycling.

**Not all of the cylinders sold have this new "green key".**

---

**ONLY CYLINDER WITH THE GREEN KEY INSERTED WILL BE ACCEPTED BY THE TRANSFER STATION FOR RECYCLING.**
